EXPERIENCE

Forward Deployed Engineer · Independent

Colombia, remote | Aug 2026 – present

Agents, data systems and direct response copywriting, one operation at a time. Judged on replies and on meetings held.

- Built and shipped: **Icarus** (v0), **the memory system** (daily use), **Vault City** (live), **the company spine** (API online), **the browser for agents** (v2), **two agents** for a pharmacy retailer (building, Sep 2026), an **AI mentoring plan** for its engineers (designed, Jul 2026). Details under Selected Projects.
- Results, no names: one cold LinkedIn message to a university clinic's head of technology, and he booked the meeting himself. A fintech CEO wrote to twenty researched companies: fifteen had a channel, six replied, five meetings.

Co-founder & Head of Growth · Frakkr

Remote, US market | Jan 2026 – Aug 2026

AI intake for US service firms, plus enterprise AI enablement. Four-person team; I owned revenue end to end: CRM, outbound infrastructure, the agents on the pipeline, the playbooks.

- Won an AI enablement engagement with a **Colombian pharmacy retailer** (140+ stores, about 2,000 registers): architecture diagnostic, systems map, a 14-item backlog of manual work, 1:1 training on their live Oracle and n8n flows. Agreed metric: hours recovered per process.
- Outbound from zero: isolated Workspace tenants, automated warmup, CAN-SPAM and TCPA-compliant email, LinkedIn and cold-call sequences.
- Two CRM generations. In the second, stage, fit score, intent and priority were formulas from activity dates, so pipeline state could not be hand-corrupted.
- Agents on the pipeline: six scheduled watchers, a five-phase enrichment pipeline, cold-lead scoring, each red-teamed for prompt injection before writes.
- First inbound asset: an 11-question intake-leak diagnostic that turns the reveal into a booked call.

Sales Expert · Asurion

Bogotá | Jul 2025 – Apr 2026

- 50+ inbound service-to-sales calls a day: resolved the claim, then sold the same caller a Verizon Home Device Protect subscription. Conversion targets hit on skeptical callers.

ML Project Assistant · Universidad El Bosque

Bogotá | Jan 2025 – Dec 2025

Built and evaluated machine-learning models for academic and applied research.

Customer Advisor · ScotiaGBS (Scotiabank)

Bogotá | Jan 2022 – Jul 2023

- 80% first-call resolution on a high-pressure financial-products line, satisfaction up 15% on my book. Matched products to clients from the bank's own data.

SKILLS

Direct-response copy. Research first · email and LinkedIn sequences · AIDA, PAS · Ley 2300 sending windows · every number with its denominator

Delivery inside the client's operation. Technical discovery · architecture diagnostics on live stacks · embedded build · 1:1 enablement · handover

Sales & GTM. Cold outreach systems · objection handling · closing · multichannel cadences · Ley 2300, Ley 1581, CAN-SPAM, TCPA

RevOps. CRM design · computed pipelines · lead scoring and enrichment · Airtable · n8n · Instantly · Apollo

Data & AI. Python · Postgres · SQL · public-record pipelines · Claude Code · MCP servers · agent skills · context engineering · prompt-injection hardening · pandas · scikit-learn

STACK

AI & agents. Claude Code (subagents, hooks, skills, MCP) · Codex · n8n · offline local AI: Ollama, Whisper, Kokoro TTS, Stable Diffusion on OpenVINO

Platforms & scripting. Obsidian · Airtable · Slack · GitHub · Google Workspace · Python · PowerShell · Bash · Playwright · Sales Navigator · Instantly · Fathom

Client stacks serviced. n8n Enterprise · Claude Enterprise · Gemini on Google Workspace · Databricks · Oracle Retail RMS v16

SELECTED PROJECTS

Icarus. BUILT · v0. Drafts every outbound touch with its reason attached, passes hard gates (Ley 2300 windows, evidence required, no invented price) and waits for a human. Nothing sends itself.

The memory system. LIVE · daily use. Rules, history and decisions in plain files my agents and I read the same way. No database, no vendor. Against RAG on 498 questions: organized files 78 per 100, flat folder 75, RAG 55. Published in full at github.com/pretending2bejhon/ulpia.

Vault City. LIVE · Sep 2026. My memory system rendered as a 3D night city at jhonalbert.com/memory: 1,246 notes as buildings in 12 districts, a timeline that plays week by week and a live soundtrack of twelve hardgroove techno rooms coded in Strudel. Anonymous by construction: no titles, paths or text leave the vault. Open source, AGPL-3.0.

The company spine. LIVE · API online. Colombia's mercantile registry, public contracting and open data as one record per company, 1,751,328 of them, one per NIT, with an API that answers which accounts are active and why.

The browser for agents. LIVE · v2. Reads a website, its ads, reels and LinkedIn page before my agents start. Reads only, never sends.

A Colombian pharmacy retailer. DELIVERED: systems map, manual-process backlog, team trained (won at Frakkr). BUILDING · Sep 2026: two agents, one briefs a manager from his mail, calendar, Slack and Drive twice a day, one answers inventory questions in Slack for his team.

The AI mentoring plan. DESIGNED · Jul 2026. A retailer's engineers build and run their own agents on real work: Oracle queries, n8n flows, invoices. Every session ends with something running.

EDUCATION & CERTS

BSc Mathematics coursework

El Bosque University, Bogotá
2024 – 2025

Software Development Fundamentals

Microsoft & LinkedIn
2023
