

Jhonalbert Alvarez

I build the revenue systems I sell.

+57 314 207 5466 · jhonalbert926@gmail.com · linkedin.com/in/jhonalbert-alvarez · pretending2bejhon.github.io · Colombia, working remotely on EU & US hours

Sales development and RevOps professional who builds his own tooling. Two years on high-volume sales floors, then cofounded Frakkr, where I designed the CRM, the outbound infrastructure, and the AI agents that run our pipeline. I close with the systems I build, and I build the systems I close with. Spanish native, English C1 certified.

EXPERIENCE

Co-founder & Head of Growth · Frakkr Remote, US market | Jan 2026 – Present

- AI intake and automation for US personal-injury law firms. I own revenue end to end on a 4-person team.
- Stood up the outbound machine from zero: isolated Google Workspace tenants on secondary domains, automated warmup, and multichannel sequences (email, LinkedIn, cold calls) built CAN-SPAM and TCPA compliant.
 - Designed the CRM data model and ran the migration from spreadsheets into a three-table Airtable base with a 10-stage funnel and locked stage vocabulary, so a bad write fails instead of corrupting the data.
 - Put AI agents on the pipeline: daily lead assignment that books each rep's morning calendar, a five-phase data-enrichment pipeline (Google Places, Apollo, web scraping), and cold-lead scoring. Red-teamed every agent for prompt injection before trusting it with writes.
 - Shipped the company's first inbound asset: an 11-question intake-leak diagnostic, live at frakkr.com/leak, that shows a firm in dollars what its intake is losing and converts the reveal into a booked call.
 - Wrote the playbooks the team sells with: cold-call flow, objection handling, discovery meetings, LinkedIn outreach, and the compliance guardrails around all of it.

Sales Expert · Asurion Bogotá | Jul 2025 – Apr 2026

- Ran 50+ inbound service-to-sales interactions a day: resolved the insurance claim first, then pivoted the same caller into a Verizon Home Device Protect subscription.
- Hit conversion targets consistently by converting skeptical, often frustrated callers: coverage-gap discovery, plain-language ROI, rapport built under pressure.

ML Project Assistant · Universidad El Bosque Bogotá | Jan 2025 – Dec 2025

- Built and evaluated machine-learning models for academic and applied research projects.

Sales & Customer Advisor · Scotiabank (Scotiabank) Bogotá | Jan 2022 – Jul 2023

- Held an 80% first-call resolution rate on a high-pressure financial-products line; customer satisfaction up 15% on my book.
- Mined internal banking data to match products to client needs. The first version of the data-driven selling I do now.

SKILLS

- Sales & GTM.** Cold outreach systems · discovery · objection handling · closing · multichannel cadences · sales compliance (CAN-SPAM, TCPA)
- RevOps.** CRM design · pipeline automation · lead scoring & enrichment · attribution · Instantly · Apollo · Notion
- Data.** Python · pandas · scikit-learn · SQL · Streamlit · explainable models over black boxes
- AI.** Agent workflows · LLM automation · prompt-injection hardening · local models for client-data privacy

SELECTED PROJECTS

- AI second brain (Obsidian).** A personal knowledge OS: one boot file tells the AI who I am and what the rules are, a routing table sends it deeper only when needed, and nightly agents consolidate the day's knowledge and learn my writing voice from my own edits.
- Book teardown & retention scorecard.** Streamlit app for insurance agencies: premium and retention attribution plus an explainable churn model with reason codes. AUC 0.74, 2.6× top-decile lift on a synthetic book, processed fully offline.
- Offline call-QA pipeline.** Local Whisper transcription feeding a structured, rubric-scored call teardown as a styled PDF. Recordings never touch a cloud API.

EDUCATION & CERTS

BSc Mathematics coursework
El Bosque University, Bogotá
2024 – 2025

Software Development Fundamentals
Microsoft & LinkedIn
2023
