FORWARD DEPLOYED ENGINEER · B2B OUTBOUND · REVOPS · AI SYSTEMS

Jhonalbert Alvarez

I build the revenue systems I sell.

+57 314 207 5466 · jhonalbert926@gmail.com · linkedin.com/in/jhonalbert-alvarez · github.com/pretending2bejhon · jhonalbert.com · Colombia, remote on EU & US hours

PROFILE

I go into the client's operation, understand the problem, build what is missing and hand it over running. I built the memory system my agents and I work in every day: it saves me about 3 hours a day of re-explaining context, and against RAG on 498 questions it scores 78 per 100 to RAG's 55. Before I build, I sell: research-first outbound that gets buyers to book the meeting themselves.

SKILLS

AI & agents. Claude Code (subagents, hooks, skills, MCP servers) · Codex · context engineering · evals · prompt-injection hardening · offline local AI: Ollama, Whisper, Kokoro TTS, Stable Diffusion on OpenVINO

Data. Python · Postgres · SQL · public-record pipelines · pandas · scikit-learn

Automation & tools. n8n · Playwright · PowerShell · Bash · GitHub · Airtable · Obsidian · Slack · Google Workspace

Delivery inside the client's operation. Technical discovery · architecture diagnostics on live stacks · embedded build · 1:1 enablement · handover

Sales, copy & RevOps. Direct-response copy, research first · AIDA, PAS · cold outreach systems · objection handling · closing · multichannel cadences · CRM design · computed pipelines · lead scoring and enrichment · Sales Navigator · Instantly · Apollo · Ley 2300, Ley 1581, CAN-SPAM, TCPA

Client stacks serviced. n8n Enterprise · Claude Enterprise · Gemini on Google Workspace · Databricks · Oracle Retail RMS v16

EXPERIENCE

Forward Deployed Engineer · Independent

Colombia, remote | Aug 2026 – present

Agents, data systems and direct-response copy, one operation at a time. Judged on replies and on meetings held.

- Saved about 3 hours a day of re-explaining context by building **the memory system** my agents and I read the same way: plain files, no database, no vendor. Against RAG on 498 questions: organized files 78 per 100, flat folder 75, RAG 55.
- Joined Colombia's mercantile registry, public contracting and open data into **the company spine**: one record per company, 1,751,328 of them, one per NIT, behind an API that answers which accounts are active and why.
- Turned cold outreach and research into meetings: one LinkedIn message to a university clinic's head of technology, and he booked the call himself. A fintech CEO wrote to twenty companies from my research: fifteen had a channel, six replied, five meetings.
- Building (Oct 2026) **Zoro**, a personal assistant: every morning it posts the state of email, calendar, LinkedIn and tasks to Slack, and every outward action waits for approval with a button. 65 requirements with acceptance tests.
- Leading (Sep 2026) **an inventory agent** for a Colombian pharmacy retailer, now in proposal: it answers inventory questions from a spreadsheet, in Slack, for his whole team.

Co-founder & Head of Growth · Frakkr

Remote, US market | Jan 2026 – Aug 2026

AI intake for US service firms, plus enterprise AI enablement. Four-person team; I owned revenue end to end: CRM, outbound infrastructure, the agents on the pipeline, the playbooks.

- Won an AI enablement engagement with a **Colombian pharmacy retailer** (140+ stores, about 2,000 registers): architecture diagnostic, systems map, a 14-item backlog of manual work, 1:1 training on their live Oracle and n8n flows. Agreed metric: hours recovered per process.
- Built outbound from zero: isolated Workspace tenants, automated warmup, CAN-SPAM and TCPA-compliant email, LinkedIn and cold-call sequences.
- Made pipeline state impossible to hand-corrupt: in the second of two CRM generations, stage, fit score, intent and priority were formulas from activity dates.
- Put agents on the pipeline: six scheduled watchers, a five-phase enrichment pipeline and cold-lead scoring, each red-teamed for prompt injection before it could write.
- Shipped the first inbound asset: an 11-question intake-leak diagnostic that turns the reveal into a booked call.

Sales Expert · Asurion

Bogotá | Jul 2025 – Apr 2026

- 50+ inbound service-to-sales calls a day: resolved the claim, then sold the same caller a Verizon Home Device Protect subscription. Conversion targets hit on skeptical callers.

ML Project Assistant · Universidad El Bosque

Bogotá | Jan 2025 – Dec 2025

Built and evaluated machine-learning models for academic and applied research.

Customer Advisor · ScotiaGBS (Scotiabank)

Bogotá | Jan 2022 – Jul 2023

- 80% first-call resolution on a high-pressure financial-products line, satisfaction up 15% on my book. Matched products to clients from the bank's own data.

PROJECTS

Ulpia. PUBLIC · MIT. The memory system as an open specification: typed markdown, a mechanical placement algorithm and a nightly consolidation loop, with a worked example vault. github.com/pretending2bejhon/ulpia

Vault City. LIVE · Sep 2026. My memory system rendered as a 3D night city at jhonalbert.com/memory: 1,246 notes as buildings in 12 districts, a timeline that plays week by week and a live soundtrack of twelve hardgroove techno rooms coded in Strudel. Anonymous by construction: no titles, paths or text leave the vault. Open source, AGPL-3.0.

The browser for agents. LIVE · v2. Reads a website, its ads, reels and LinkedIn page before my agents start. Reads only, never sends.

The AI mentoring plan. DESIGNED · Jul 2026. A retailer's engineers build and run their own agents on real work: Oracle queries, n8n flows, invoices. Every session ends with something running.

HOW I WORK WITH AI

Spec first: a design interview and a build loop graded against a rubric before any code. Subagents under a contract: reads fan out, writes never do; one model designs and reviews, another executes. A second model reviews adversarially before anything is called done, and nothing is called done without fresh evidence.

EDUCATION & CERTIFICATIONS

BSc Mathematics coursework · El Bosque University, Bogotá · 2024 – 2025

Software Development Fundamentals · Microsoft & LinkedIn · 2023

LANGUAGES

Spanish native · **English** C1 certified
